Sodium Picramate

(Commercial Grade)

Sodium Picramate known as 2-Amino-4,6-Dinitrophenol Sodium Salt, commercial grades. The **commercial grade Sodium Picramate** is red to brown in color and available in moist powder form. It consists Sodium Picramate (Amino content) of 60-70% and Picric acid content less than 0.5%.

Commercial use of Sodium Picramate in Leather Dye Intermediates Production,

manufacturing of Acid Dyes Intermediates, Intermediates for Brown 75 and as Primary controlled Explosives.

Hazardous material.

Product Identifiers

Categories	Specifications
Product Name	Sodium Picramate
Chemical Name	2-Amino 4,6-Dinitro Phenol Sodium
Chemical Formula	C ₆ H ₄ N ₃ O ₅ Na
Molar mass	221
CAS Number	831-52-7
UN Number	1349
Packing Group	I
Hazard Class	4.1

Properties

Categories	Specifications
------------	----------------

Solubility (In Soluble)	Alcohol, Benzene, Glacial Acetic Acid, Aniline, and Ether
Physical State	Moist Powder
Taste	Bitter
Color	Red to Brown
Purity(Dried)	25 – 35%

PACKING DETAILS:

1. 60 Litre. HM-HDPE Open Top Carboy with Plastic Liner, Contains 50 Kgs. Net Wt.
2. 30 Litre. HM-HDPE Open Top Carboy with Plastic Liner, Contains 15 Kgs.Net Wt.
3. 210 Litre. M S Drum with Plastic Liner.
